

Bugs

- Watching or unwatching game redirects to home page
- Forums dont work at all
- Editing a user not attempted
- Creating a new user not attempted

Routes

- "Get /games" - lists all games
- "Get /user/:id" - shows use information
- "Post /resetdb" - reset's db to initial data
- "Get /games/pricey" - retrieves pricey games from steamAPI
- "Get /games/popular" - retrieves popular games from steamAPI
- "Get /games/:ids" - retrieves game info from steamAPI
- "Put /user/:id/watchlist/:appid" - adds to user's watchlist
- "Delete /user/:id/watchlist/:appid" - removes from user's watchlist

Member Contributions

Tom

- Fixed my profile
- Restructured the project to include the client and server parts
- Added methods to get user id from token in server
- Ported in server json validation
- Imported data to server side database
- Wrote "get /games"
- Wrote "get /user/:id"
- Wrote "post /resetdb"
- Added resetdb button
- Used steam api to retrieve game prices and format for page
- Used games from steam api on front page
- Used games from steam api on games page
- Added logic in server to estimate future prices
- Wrote "get /games/popular"

- Added packages to server for ease of use (request and extend)
- Wrote "get /game/:ids"
- Moved all games tables to new component
- Wrote logic to follow and unfollow games
- Wrote "Put /user/:id/watchlist/:appid"
- Wrote "Delete /user/:id/watchlist/:appid"

Chris

- Search functionality

William

- Created an Error banner
- Edited server.js to make error banner visible

Theo

- Create a new user

Eric

- Edit a user profile

Ivan Siryk

- Added a directory for forums
- Created topics for forums
- Created layout for forum main page and topic pages
- Created the json schema for the forum posts
- Edited app.js to have routes to the different forum pages
- Added helper files for the forums
- Added methods to server to help with forums
- Edited the database for forum data
- Created util.js to track time
- Added functionality to traverse forum
- Added a bunch of dummy data to the database
- Created a json schema for the forum
- Bugs:
 - The forum still doesn't work because I bit off a bit more than I can chew when I said the forum can be done just by me, the team will split up the forum into a few smaller projects and it will be completed as soon as possible. For now the forum is just a static folder with dynamic routing.

Special Server Setup Procedure

- Need internet access to reach steamAPI
